For Immediate Release

Albuquerque, NM– Spring Break makes for a great pause in routine: parents don't have to pack lunches while rushing their kids off to school, and kids can relax while thoughts of class and learning dissipate with ease. But is a total break from the continuity of learning best for children?

Ample studies prove we're best off keeping kids educated during breaks, however it's not simply a matter of 'why,' but 'how.' Maintaining a healthy, gentle routine of inquisitiveness keeps anyone—child and adult alike—engaged in the learning process, but how is vital: “If we can intersect the enjoyment of childrens’ favorite topics and activities with their inherent skill sets, we’ve hit that ‘sweet spot’ creating intrigued, life-long learners who will always seek out knowledge for themselves as a habit,” says Amythyst Marciano, Marketing Communications Manager of Explora and former Professor.

Enter Explora’s vast array of Spring Break Camp Programs, offered this March 16th-24. Scores of topics include explorations into air, shadow and light, Lego construction, polymers, cuisine, robots, farm camp, the Chemistry of Cosmetics and so much more. Half and full-day camps available for grades preK-7th, in a materials-rich and creative environment that inspires hands-on STEAM investigation and practice. Aftercare and financial assistance available on all programs upon request! For more information and registration, please visit:
